

AMBDULHAFFAR AHAMADI

Fullstack & AI Developer

Tétouan, Morocco | elhaffarahamadi@gmail.com | +212 632888924 | [linkedin.com/in/ambdulghaffar-ahamadi](https://www.linkedin.com/in/ambdulghaffar-ahamadi) | github.com/ambdulghaffar

PROFESSIONAL SUMMARY

Fullstack Developer holding a Master's degree in Software Quality, with strong expertise in modern web and mobile application development (Spring Boot, Next.js, Flutter) and a strong interest in Artificial Intelligence. Skilled in designing complete solutions integrating Machine Learning and LLMs to deliver high-value intelligent features — from prompt engineering and AI-powered scoring systems to dockerized fullstack platforms. Rigorous and architecture-oriented, committed to building performant, scalable, and user-centered software.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Bootstrap, Shadcn UI, HTML/CSS, JavaScript

Backend & Scripting: Spring Boot, Java 21, Spring Security, JPA/Hibernate, Laravel, PHP, Python, FastAPI

Mobile: Flutter, Dart, Riverpod

AI & LLM Integration: LLMs (Groq API), Prompt Engineering, Streamlit

Databases & Auth: PostgreSQL, PostGIS, MySQL, SQLite, Supabase, Row Level Security (RLS), NextAuth, JWT, OAuth2

Cloud, DevOps & Messaging: Docker, Docker Compose, GitHub Actions (CI/CD), Apache Kafka, Firebase (FCM)

Tools & Practices: Git, GitHub, GitHub Actions, RESTful APIs, Postman, Swagger / OpenAPI 3.1, Jira, UML

PROFESSIONAL EXPERIENCE

Fullstack Developer — Backend Spring Boot & Mobile Flutter (Internship)

S B SOLUTIONS MA | Tétouan, Morocco | Jan 2026 – Jun 2026

Development of RiLyGo V2, a platform connecting drivers with automotive service providers in Morocco, featuring an intelligent dispatch engine (Relayer AI).

- Built a multi-criteria scoring engine for intelligent service-provider dispatch (Relayer AI)
- Implemented the Transactional Outbox pattern with Apache Kafka for reliable event processing
- Authored REST API documentation using Swagger / OpenAPI 3.1
- Developed geolocation features (PostGIS), FCM push notifications, and FAQ & Legal modules
- Built a multi-profile Flutter application (Client, Garage, Employee) using Clean Architecture
- Implemented Email and Google OAuth2 authentication, GPS tracking, and mobile dispatch

Tech stack: Spring Boot, Java 21, PostgreSQL, PostGIS, Kafka, Firebase, Flutter, Dart, Riverpod, Docker, JWT

General Controller

Association of Comorian Students in Morocco | Tétouan, Morocco | 2023 – 2025

- Participated in meetings and managed application files for financial aid requests
- Supervised multiple operations and purchases for organized events
- Coordinated tasks to achieve annual objectives and prepared financial reports

KEY PROJECTS

CV Analyzer AI — AI-Powered Resume Matching Platform

Personal project — dockerized fullstack platform (frontend, backend & infrastructure repositories)

Analyzes the compatibility between a resume and a job posting using an LLM (Llama 3.3 70B via Groq), with weighted scoring, an AI-generated candidate ranking mode for recruiters, and cover letter generation. Built with a structured prompt engineering approach (chain-of-thought reasoning, anti-hallucination rules, JSON-validated output).

Stack: Next.js, TypeScript, Tailwind CSS, Shadcn/UI, FastAPI, Python, Supabase, PostgreSQL, Groq API, Docker, Docker Compose

[GitHub Repo](#)

Fraud Investigation Chatbot — LLM Dialogue System

Academic project — conversational AI agent

An LLM-driven conversational agent conducting an interactive investigation to validate suspicious transactions and detect fraud patterns.

Stack: Python, Streamlit, PyTorch, Machine Learning, Generative AI (LLMs)

[Kaggle project](#) | [GitHub Repo](#)

Fullstack Stock Management Application

Personal project — frontend (Next.js) & backend (Spring Boot) repositories

Inventory management platform with complete authentication and user management. Feature-based architecture on the frontend, DTO pattern and Clean Architecture on the backend.

Stack: Next.js, TypeScript, Tailwind CSS, Shadcn/UI, NextAuth.js, Spring Boot, Spring Security, JWT, JPA/Hibernate, PostgreSQL

[Frontend Repo](#) | [Backend Repo](#)

Medical Appointment Booking Platform

Bachelor's final project

Online appointment booking platform connecting patients and doctors, including scheduling and profile management.

Stack: HTML, CSS, JavaScript, Laravel Blade, Bootstrap

[GitHub Repo](#)

BookShop API — Spring Boot & DevOps

Academic team project — RESTful API with automated CI/CD deployment

RESTful online bookstore API secured with JWT authentication and role-based authorization. Developed collaboratively in a team of five, featuring an automated GitHub Actions CI/CD pipeline for build, testing, Docker image creation, deployment to a Linux server via SSH, and application health checks.

Stack: Spring Boot, Java, Spring Security, JWT, MySQL, Docker, Docker Compose, GitHub Actions (CI/CD), Docker Hub, Git, GitHub

[GitHub Repo](#)

EDUCATION

Master's Degree in Software Quality

Abdelmalek Essaâdi University, Faculty of Sciences of Tétouan | 2024 – 2026

Bachelor's Degree in Mathematics and Computer Science

Abdelmalek Essaâdi University, Faculty of Sciences of Tétouan | 2021 – 2024

Baccalaureate (Scientific — Series C)

Bamabo Mtruni High School, Tsembehou, Comoros | 2020 – 2021

LANGUAGES

English: Fluent | French: Bilingual
